

Fred V. Fowler Company, Inc.

Twin Beam Dial Height Gage

Fowler's digit counter height gage combines a large dial indicator with a dual-directional digit counter. Two separate digit counters register upward and downward travel. A zero setting can be obtained anywhere within the range of the gage.

Coarse readings are in .100" graduations and fine readings taken on the indicator are .001".

Special Features:

- Large knob for coarse and fine adjustment.
- Dual chrome-plated beams.
- Zero/reset button located on foolproof digital counter.
- Carbide tipped scribe and clamp.
- Also includes locking lever.
- Base hardened and ground.
- Base lapped for maximum flatness.
- Fitted wood case

Order No.
