RETURN AND SERVICE FORM

Assigned by a QCSI representative

RMA # _____

IMPORTANT:

Please complete all fields of this form to ensure that your products are processed quickly and accurately. If we should quote your distributor, complete the appropriate fields in the "Quote To" section. Include this form with your products when shipping them to us.

If a purchase order is available, please include a printed copy.

Ensure that the items are packaged securely (preferably in their original packaging) to prevent damage during shipment, especially for low capacity instruments. For Mark-10 Series TT03/ MGT / R50 / STJ torque measuring instruments with capacities of 50 ozFin (35Ncm) or less, it is essential to reinsert the original protective tubing around the chuck. Contact us if you are missing this tubing.

A $75.00 evaluation fee will apply, however, it is waived if the quoted services are ordered.

RETURNED ITEMS
